3. Outboard Motor (OBM) Machine

- Outboard motors (OBMs) are compact propulsion systems mounted externally on boats, providing power for propulsion and steering.
- They consist of an engine, gearbox, and propeller, offering versatility for various boating activities.
- OBMs are easy to install, maneuverable, and can tilt out of the water when not in use, making them convenient for boat owners.
- Their self-contained design allows for maintenance and repair without needing to access the boat's interior, simplifying upkeep for boat owners.

4. Windsurfer

- Windsurfing is a water sport where participants ride a board with a sail attached to a mast, using wind power for propulsion.
- Windsurfing equipment typically includes a board, sail, mast, and boom, with different sizes and designs available to suit varying wind conditions and skill levels.
- Windsurfing can be enjoyed in a variety of settings, including lakes, rivers, and oceans, making it a popular recreational activity worldwide.

5. Gemini Boat / Rescue Boat

- The Gemini Rescue Boat is a versatile rigid-hull inflatable boat (RHIB) commonly used for search and rescue missions, maritime law enforcement, and coastal patrol.
- Equipped with powerful engines, Gemini Boats can reach high speeds, enabling rapid response times during emergencies and search operations.

6. Life Jackets

- Life jackets are essential safety gear designed to keep individuals afloat in water and prevent drowning.
- Life jackets are required safety equipment on most watercraft and are recommended for anyone participating in water activities, regardless of swimming ability or experience.

7. Tent

- Tent pitching involves setting up a tent for shelter during outdoor activities such as camping, backpacking, or hiking, requiring knowledge of tent components and proper techniques.
- Selecting a suitable campsite with level ground, natural wind barriers, and proper drainage is crucial for a successful tent pitch.

8. Life Rings

- Life Rings are essential safety equipment used to rescue individuals in distress in water emergencies.
- Life rings are typically brightly colored and highly visible, making them easy to spot in water and aiding in quick identification during rescue operations.
- Proper maintenance and inspection of life rings are essential to ensure their readiness for use in emergencies, including regular checks for integrity, buoyancy, and rope condition.

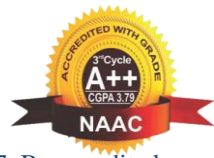

9. Paddle Boats

- This paddle boat, designed for recreational use, typically operates in calm waters like lakes or ponds. It accommodates up to seven people, with three seats in the front and four in the back. Passengers facing in the front operate the pedals to propel the boat forward. The paddling mechanism uses human power to rotate the paddle wheel, moving the boat across the water.
- Its lightweight and plastic construction make it easy to maintain, and it's often used for leisurely activities in parks or resorts. This particular boat appears well-suited for group outings or family trips on small bodies of water.
